MICRO ODOR BLASTER

Product Description and Purpose

Micro-Odor Blaster is formulated with patented technology that provides immediate metabolic activity (waste degradation) and is environmentally safe. Our microbes work by combining the oxygen in the air with odor molecules causing the odor to disappear in minutes or seconds without just covering it up. Our microbes are enclosed in a sheath to protect them from chlorine, sanitizer and heat, which easily kills unbound microbes. This gives Micro-Odor Blaster a distinct advantage when used in drain-line maintenance. In addition, Micro-Odor Blaster has stabilized live vegetative microbes in a liquid form. The result is a solution that quickly degrades petroleum hydrocarbons, vegetable and animal fats, oils, greases, waste solids and other organic compounds with an easy to apply and versatile treatment.

HOTELS MOTELS AUTOMOTIVE:

Micro Odor Blaster is very effective at removing smoke odors.

Other uses are: kitchens, bathrooms, basements, garages, cat boxes, garbage cans, cars, trucks, boats, RV's, and anywhere malodors can be found, just spray **Micro Odor Blaster** in the air and it will remove most odors in minutes or seconds depending on the odor. It is safe on wood, ceramic tile, plastics, fiberglass, laminates, metal, rubber and fabrics.

Features/Benefits

Micro Odor Blaster destroys cooking odors from meat, fish, poultry, vegetables and fruit. Diesel fuel odors, human and animal waste, most mold and mildew odors, smoke and pet odors, ammonias and other common odors are effectively removed. It can be used as a room spray, in carpet extraction cleaning, diaper pails, bed linen, added to wash machines.

ADVANTAGES OVER OTHER DEODORIZING PRODUCTS

- **Enzymes** take longer to work and may cost up to 40 times more than Micro Odor Blaster.
- **Quaternary deodorizers** can be very hazardous and work on a limited number of odors.
- **Hypochlorite and Chlorine bleaches** have a strong odor of their own and can generate toxic gases.
- **Hydrogen Peroxide** is relatively safe but a large amount may be needed since it is used up in the odor neutralizing process, where our Micro Odor Blaster will keep on working.
- **Masking Agents** only numb the sense of smell rather than eliminate the odor.

TECHNICAL DATA

TRY MICRO ODOR BLASTER TO FRESHEN UP YOUR ENVIRONMENT SAFELY!

General Usage Directions

Use as is, do not dilute. Spray liberally onto contaminated area to remove odor.

Physical Properties

Form	Liquid
Color	Clear
Odor	Mountain Air Scent
Specific Gravity	1.00-1.03
Boiling Point	>210°F
pH	6.0-8.0

Caution

Keep out of reach of children. Keep container tightly closed when not in use. Protect from freezing. For industrial use only. Read Material Safety Data Sheets for more information.
