

TECHNICAL DATA

SALT-B-GONE

CORROSIVE SALT NEUTRALIZER

Product Description and Purpose

SALT-B-GONE is a concentrated rinsing/flushing agent designed exclusively to remove salt residue/crystals from any surface! **SALT-B-GONE** contains a unique blend of organic acids, corrosion inhibitors, surface reducing agents and fragrance. This product will not harm painted surfaces. Will give rust and corrosion protection. Anywhere salt is a problem, **SALT-B-GONE** can be used!

Where Used

Use on any vehicle, truck, truck bed, bus, snow plow, salt spreader, snow blower, tractors, shovel or any equipment at risk of corrosion from salt residue.

SALT-B-GONE, when mixed with fresh water, does several things...

- 1. It buffers the salt film on the surface and protects the metal with corrosion inhibitors.*
- 2. It dissolves and lifts the salt film back into solution to be rinsed away.*

SALT-B-GONE gets into cracks and crevices, and will quickly remove the salt residue that has accumulated there!

- 1. Mix 6 ounces of SALT-B-GONE per gallon of warm water.*
- 2. Spray solution onto equipment surface and allow to react for 2-4 minutes.*
- 3. Flush equipment with clean water*
- 4. Wash equipment with Dyna TW*

TECHNICAL DATA

Physical Properties

Biodegradable	Yes
Physical Form	Clear to Hazy Liquid
Wetting Ability	Good
pH	≤1.0
Specific Gravity	1.00-1.05
Rinsability	Good
Odor	Fresh Cherry Scent

Caution

KEEP OUT OF REACH OF CHILDREN. For industrial use only. Harmful if swallowed.

Read the Material Safety Data Sheet and Product Label for specific first aid procedures, product warnings and recommended Personal Protective Equipment.
